

IN OUR CASE, Bigger Means Better.

At ITW Sexton, we have the size, experience and commitment necessary for manufacturing a wide range of standard and custom filter and capacitor shells. With nearly 100 years of experience, we have pioneered the manufacturing of **deep-drawn metal containers**.

As an **industry leader**, we offer:

- > **High-quality, deep-drawn metal containers**
- > **More than 350 variations**
- > **MRP services, stocking programs and blanket orders**

With a strong focus on continual improvement, we make even the most demanding changeovers routine. We also give you short runs under tight lead times while meeting the exacting specifications of industries ranging from automotive to appliance to electronics, and more.

The quality and integrity of the shells we produce in our Martinsburg, WV facility is what sets our products apart from all the others. While many of our competitors use aluminum, ITW Sexton uses high-quality steel materials in producing a wide variety of sizes.

By using deep-drawn steel to make our filter shells, we enable your products to have superior strength, durability, fire resistance and environmental friendliness. That's because no material is wasted in the steelmaking process and steel is a highly recyclable material that has many post-consumer applications.

Pioneering Metal Container Design & Production

The Widest Variety of Standard & Custom Shells

The depth and breadth of our standard filter and capacitor shell selection gives you more choices than you'll get anywhere else. We also set the industry standard for the ability to produce custom sizes and deliver them on a regular schedule, or just-in-time.

Regardless of your needs, ITW Sexton has the ideal solution.

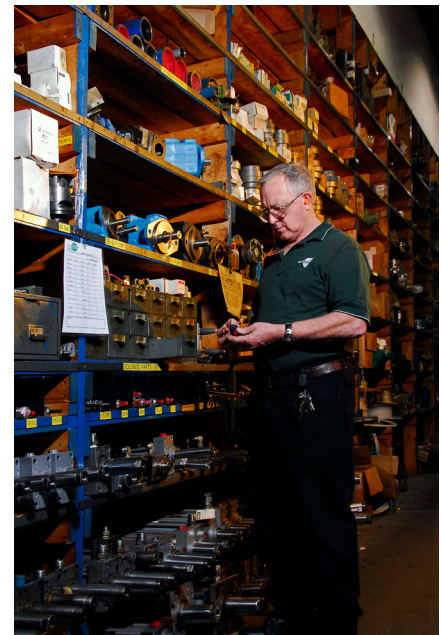

STANDARD FILTER SHELLS					
STYLE NO.	STYLE TYPE	INSIDE DIMENSIONS	MINIMUM HEIGHT	MAXIMUM HEIGHT	METAL GAUGE
